PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

Software Engineer Trainee

Dec 2025 - Present

Pune, IN

- Developed backend services for Clearing & Settlement System using Java and Spring Boot, automating post-trade processing, netting and settlement workflows.
- Designed financial transaction workflows using state-machine architecture, ACID consistency, and reconciliation validation across the trade lifecycle.
- Built secure REST APIs using Spring Security RBAC, JPA/Hibernate with SQL queries, and layered Spring MVC architecture.
- Implemented centralized validation, global exception handling, structured logging, and Spring Actuator monitoring.

Indian Institute of Technology (IIT), Mandi

Research Intern

Feb 2025 - Aug 2025

Mandi, HP, IN

- Contributed to DRDO-funded Adaptive Cognitive Science research under LSRB-DIPR program.
- Co-authored “Forecasting EEG-Based Attention Across Multiple Horizons for Proactive Brain-Computer Interfaces.”
- Developed Adaptive Cognitive Assessment Tool using Inquisit; implemented a dynamic difficulty scaling algorithm that adjusted task complexity in real-time based on historical latency and accuracy metrics.
- Designed CNN+LSTM models achieving 80% accuracy in multi-step focus prediction using EEG.

Ernst & Young (EY)

Tech Consulting Intern

Apr 2024 - Jun 2024

Gurugram, IN

- Worked under the PMU of the Ministry of Social Justice and Empowerment (Govt. of India).
- Built REST-based backend application using Flask for large-scale mental health assessment across 300+ students.
- Integrated ML sentiment analysis and achieved 87% accuracy in detecting anxiety, stress, and depression in real-time.
- Designed database workflows using SQLite managing 500+ user records with optimized data retrieval.

PROJECTS

Touchless Tech [\[Link\]](#) (Python, MediaPipe, Gemini API, Speech Recognition, NLP, Eel, JavaScript)

- Developed a gesture-driven (MediaPipe) and voice command (Gemini AI) touchless interaction system for desktop.
- Implemented real-time tracking including Single/Double Click, Volume & Brightness Adjustment, Drag & Drop, etc.

Handwritten Digit Recognition using MNIST [\[Link\]](#) (Python, OpenCV, Keras, TensorFlow, Pygame, Pyttsx3)

- Built a neural network model achieving 98% accuracy in recognizing and vocalizing handwritten digits within 50ms.
- Applied data pre-processing, dimensionality reduction, and classification using logistic regression and deep learning.

Autism Detection Model for Early Childhood Screening [\[Link\]](#) (SVM, Matplotlib, Seaborn, Jupyter Notebook)

- Designed and trained an SVM model to identify potential signs of autism in children (ages 0-3), achieving 93% accuracy.
- Presented the findings at Health-A-Thon, Lloyd College of Pharmacy, Greater Noida.

TECHNICAL SKILLS

- Languages:** C/C++, Java, Python, SQL
- Frameworks:** Spring Boot, Spring Security, Hibernate/JPA, RESTful APIs, Microservices, MVC Architecture, Flask
- Databases & Tools:** MySQL, SQLite, Git, Maven, Postman
- Core Engineering:** OOP, Data Structures & Algorithms, System Design, Transaction Management (ACID), Design Patterns

ACHIEVEMENTS

- Solved 950+ DSA problems on LeetCode (Rating 1665 - Top 16%).
- Secretary of HexClan Coding Club, organized events with 1000+ participants in collaboration with GFG and Unstoppable.
- 1st Runner-Up, 24 Hour Code-A-Thon (2023).

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Dr. A. P. J. Abdul Kalam Technical University, Lucknow

8.1 CGPA

2021 - 2025

CERTIFICATIONS

- AWS – re/Start Graduate
- Google – IT Automation with Python
